Question: Why is eqMac asking for Admin Password during the first launch? Answer: The way eqMac works it needs to install an Audio Driver, to do that it needs your system password.. Question: Why is eqMac asking for permission to access my microphone? Answer: macOS does not have direct way to access the System Audio stream, so we use the eqMac Audio driver to divert the system audio to the drivers input stream.. I was looking for the same thing I tried an app called Boom, available from the App Store which, among other things, gives you a system-wide equaliser for your sound output (I found it's primary function - boosting your system volume - to be useless and turned that off).. It worked as advertised, but I eventually found it too intrusive and simplistic for my liking. [Android zip file from url and unzip](#)
