This was a truly amazing story. Leaving you with the desire to play it again just to see how different things could have been. By far one of my most enjoyed choice adventures by Devon Connell. Without a question if you enjoy choice games you'll enjoy this one.

My thanks on such an epic story and adventure. A+++ . Now that's some quality art for cheap!!

I am TOTALLY going to use this in creating a cool and unique game on the Switch!

Keep the art packs coming, folks!. Let's be real, this game is hilarious and really challenging. The mechanic of controlling two characters at once is done really well. It's frustrating and brain bending enough to be a real challenge, but reasonable enough that you can master it in different ways.

The art and design is really excellent, and the music is also really cool. So impressed that it was all done by one developer. This game is massive value for money and is especially fun playing with a friend and taking turns.

Wasn't part of the kickstarter, and stumbled onto the game completely by accident, but so damn glad I did.. I waited sooo long for them to release this game, and now that it's out, all I can say is big WOW  
Story is perfect so far (I passed maybe 40% of the game), it's really comic and above all, it's very interesting to play :)

Keep up the good work guys ^\_^ . Kickass RPG. If you've ever liked Baldur's Gate, Icewind Dale, classic uber RPG's, this is the best one since those Bioware titles were released. Very easy to use the controls, fun to play a quick few fights or get deep into, well worth the price!

Game is too short even for 60 cents. Classic Lumines. It plays great. It sounds great. While I was playing, a Windows Update thing popped up and minimized the game. That was annoying but when I went back to it, it was on the pause menu so at least it automatically pauses when the program loses focus. Nice.

Anyways, if you like puzzle games or music games, check this one out!. I would have never bought this game if I didnt get a 75% discount the most horrendous peice of game u could ever buy that 5 minutes of playing the game was a waste of key strokes.. I had to write a review after playing this game. I got almost all of the secrets.

This game is deep in content so play each chapter following the characters.  
I highly recommend when you find a diary, read it!  
There is a lot of hidden dialogue and story behind the story.  
Even when you beat the game there is a little more so get those diaries!

By far one of the best story line based games I have played in a long time!  
I highly recommend this game for anyone who loves kickback vr games you can play sitting down.. this game made me depressed 10/10. They're pilots, not planes  
If you wanted planes you probably should have checked the screenshots first. I was dodging bullets perfectly and a rocket flew away off the screen and insta-killed me. Woooooooooow.
